# The MediRaf

**Adaptive Microneedling With The Most  
Powerful RF On The Market**

## When You Need Results, Don't Hedge.

RF Microneedling is increasingly the treatment of choice for patients looking for that perfect middle ground between skin tightening efficacy and minimal downtime.

And the MediRaf is one of the world's most effective bi-polar RF microneedling solutions.

Most devices utilize a 1Mhz frequency. The MediRaf uses 2Mhz, the ideal frequency for skin tightening.

Most RF modules have a peak of 40W of RF energy. The MediRaf boasts twice that.

Most devices rely on riskier non-insulated tips. The MediRaf comes with partially-insulated tips for greater focus and concentration of energy at a precise depth.

Simply put, the MediRaf will allow your patients to experience greater results in fewer sessions.

**Potent. Controlled. Effective.**

# America's Leading Clinics Use Medicreation Devices.

## The MediRaf:

<b>Depth</b>	0.5-3mm
<b>RF Energy Transmission</b>	4mm
<b>Frequency</b>	2 Mhz
<b>Surface Tip</b>	Multi-Focal, Surface Tip
<b>Cooling Handpiece</b>	Used before/after w/ surface RF tip
<b>2nd HP for RF only</b>	Yes (no needles)
<b>Speed</b>	Up to 2 hz per second

# Sick of the Status Quo? So Are We.

The Medicreations  
team has nearly

# 50

years of combined experience immersed in some of  
the world's leading aesthetic device brands.

We've learned how things are "supposed to go" from the giants of the industry. **It's terrible.**

**Devices built around...** Expensive, single-use consumables. Manipulative sales tactics. Absurd pricing structures designed to gouge every last cent from care providers.

**So...** We got together some pretty smart scientists, engineers, and business people to do things differently.

## **Our revolutionary idea:**

Make a living *with* the people who use our devices, not *from* them.

# Quality Devices + Transparent Process + Fair Pricing = Our Promise

Aesthetic care professionals should have access to reliable, high-performance devices at prices that actually make sense.

That's why we design our machines to utilize *as few consumables* as possible, even when competitors don't. Why we have a *industry-leading two-year guarantee* for all parts and damage. Why even though we'd put our devices against nearly any other brand's in terms of performance, *we don't charge a premium*.

As for our process, our representatives will never sell you a device that you do not need. If it won't improve your business and make your life richer, it doesn't go out the door. Period.

**“The way it's always been”** isn't the right way. We want to do better.

# Always Built In Our FDA-Compliant Facility Right Here In Las Vegas, NV.

Medicreations devices are some of the only aesthetic care devices fully manufactured in the United States, with at least

# 61%

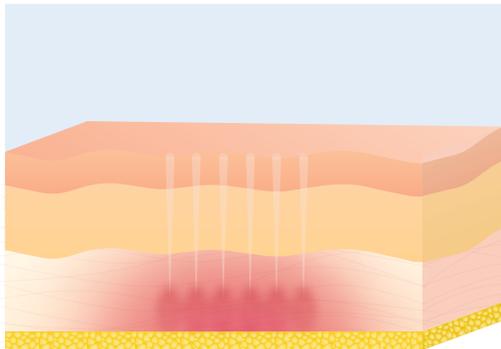

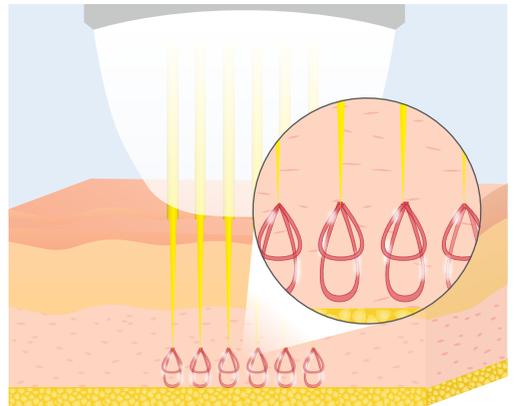

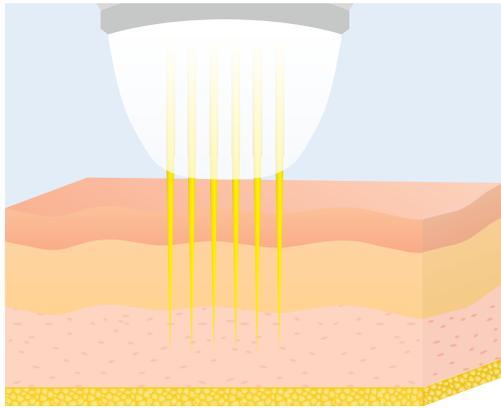

of all components sourced from U.S. suppliers.

Our FDA-compliant facility features a clean room and full-service center, staffed by our excellent team of professionals. Every device is meticulously built and subject to strenuous quality control checks before shipping out.

We film videos of our process and offer guided tours of our facility on request. We are proud of how we build our devices and what goes into them.

If you're ever down in Vegas, let us know and we'll show you around!

# How The MediRaf Renews The Skin:

# Four Independent Settings Ensure Unique, Customized Treatment.

Getting incredible results for your patients means taking into account their unique physiology, skin type, and sensitivity.

The MediRaf prioritizes flexibility. You can offer light treatments with minimum invasiveness to one patient, while pulling out the “big guns” for the next, with the most powerful microneedling bi-polar RF available.

***It comes with two different microneedling attachments: 25 and 49 pins.***

And that’s just the start.

You can set the frequency of RF pulses. The power intensity and pulse width behind the emitter. The depth of needle penetration. The intervals between needle penetrations.

The image shows a digital control interface for a Micro Needle RF device. The interface is titled "Micro Needle RF" and features several adjustable settings:

- INTENSITY:** Set to 3.
- ACTIVE PULSE (10-900 ms):** Set to 80 ms.
- Bi-Polar:** The selected treatment mode.
- DEPTH (0.5 - 3MM):** Set to 0.5 mm.
- INTERVAL TIME (0.5 - 3 sec):** Set to 0.5 sec.
- SHOT COUNT:** Set to 0000, with a CLEAR button next to it.

At the bottom of the interface, there are three buttons: BACK, COOLING HEAD, and STANDBY.

*Each of these setting can be changed independently of any other, which means every patient will receive exactly what they need.*

# Better Clinical Sessions And Outcomes Are In The Details.

## Step by step, the little things make the difference.

When beginning treatment, needles smoothly slide into the skin, rather than “popping” in and out. This is a result of the special stepper motor we utilize for the handpiece, which means less tearing skin, less pain.

When these needles hit the targeted depth, focused RF energy is released directly from the tip of the needles for maximum efficacy. This stimulates the fibroblasts and also tends to result in less bleeding during treatment.

Finally, a multi-focus fractionated RF handpiece can be utilized to supplement collagen and elastin growth at different depths. It can also pre-heat the skin prior to treatment for more comfortable sessions. *The MediRaf is the only RF microneedling device with a separate surface RF handpiece.*

When you need real results for facial rejuvenation, skin tightening, and wrinkle reduction, consider the unique mix of versatility and power that is the MediRaf.

# How Much Can You Earn With A MediRaf?

3 Procedures — **\$450** / Package — **\$1250**

7 Procedures — **\$450** / Package — **\$2700**

Monthly Treatments	Monthly Revenue	Annual Treatments	Annual Revenue
10	\$4500	120	\$54,000

# Every Medicreations Device Is Backed By An Industry-Leading 2-Year “We’ll Fix It” Warranty.

In the rare event your devices malfunction or break due to a technical defect—we’ll **take care of it.**

The benefit of having our manufacturing facility in the U.S. is that we always have access to the very same engineers and technicians who designed and built your machine in the first place. We know exactly how to get your devices working perfectly again. And if we don’t? We’ll replace it at no charge. **Simple.**

We stand behind our products for a full two years—double that of the industry standard. Nor do we require you to pay tens of thousands of dollars for that warranty.

If you buy any Medicreations device, you just won’t have to worry about it for a full 730 days, with options past that.

## The Whole Is Greater Than The Sum Of Its Parts, And Definitely One Part Alone.

To most med spa operators, a single device can seem like an incredible investment. Here's the calculus.

If a machine works out well, the buyer might earn a return in 2-3 years. At which point they might buy a different one. Rinse and repeat, and they could one day provide the full range of experiences their patients are looking for. Theoretically.

*Let's skip that.*

---

Medicreations offers a whole suite of products to deliver comprehensive aesthetic treatments for patients, all at the cost of a single device from other manufacturers. You can provide hair removal alongside skin tightening, body sculpting with muscle toning, or any other synergistic combination. No waiting for years—you could own them all tomorrow.

**The difference between 1 device & several is incalculable.**

It's a single instrument against an orchestra, a solo competing with a symphony. Only when all the pieces meld together will you find yourself producing that cohesive experience that is "just so."

# We'll Teach You Everything About Your Device (And More Besides).

We *love* helping people learn the science and use behind our products. Seriously. So much so we actually built a little academy here in Vegas to do it better.

You'll receive a comprehensive onboarding process when you get any of our lineup at no additional cost. Everything you need to know about usage and care of your devices will be included. That's expected, a given. But we offer more.

**Regular Webinars With Top Doctors On The Science**

**In-Person Seminars With Use-Cases**

**Live Demonstrations**

**Q&A Sessions**

**Marketing Help**

Whatever you want to learn, we'll provide.

# See If A Medicreations Device Is Perfect For You

**Lets talk.** We'll make sure you understand the science behind the device you're interested in, who it's ideal for, and how to get the most from it. And if during the process, you find out you're not so sure it's for you?

**That's OK.**

We only want to sell devices that we sincerely believe will be a benefit to your practice, help you hit the goals you want to hit, and blow your ROI out of the water.

Something that checks every box for you in particular, with NO exceptions.

**Maybe that something will be a Medicreations device.**
