

MC MEDICREATIONS

The MediClear

**The New Paradigm For
Needleless Injection Technology.**

Transform The Skin At The Deepest Level With HydroSonic Infusion™.

“Non-invasive” doesn’t have to mean
“non-effective.”

For some people it does. After all, many, perhaps even most, non-invasive aesthetic treatments are short-term and affect only the very surface of the skin.

Greater efficacy usually means high intensity lasers. Needles. Knives. In other words: pain, complication, and long recovery times.

The MediClear is a device engineered from the ground up to enhance the benefits of non-invasive beauty treatments while shedding the downsides of more invasive procedures.

The device’s innovative HydroSonic Infusion™ technology allows any esthetician to deliver beneficial liquid solutions through the surface of the skin to affect the deepest level of the skin.

Penetrating that outer protective layer means solutions simply work better, last longer, and have the absolute best chance of affecting change in a patient’s appearance.

Here’s how it works.

Sick of the Status Quo? So Are We.

The Medicreations team has nearly

50

years of combined experience immersed in some of the world's leading aesthetic device brands.

We've learned how things are "supposed to go" from the giants of the industry. **It's terrible.**

Devices built around... Expensive, single-use consumables. Manipulative sales tactics. Absurd pricing structures designed to gouge every last cent from care providers.

So... We got together some pretty smart scientists, engineers, and business people to do things differently.

Our revolutionary idea:

Make a living *with* the people who use our devices, not *from* them.

Quality Devices + Transparent Process + Fair Pricing = Our Promise

Aesthetic care professionals should have access to reliable, high-performance devices at prices that actually make sense.

That's why we design our machines to utilize *as few consumables* as possible, even when competitors don't. Why we have a *industry-leading two-year guarantee* for all parts and damage. Why even though we'd put our devices against nearly any other brand's in terms of performance, *we don't charge a premium*.

As for our process, our representatives will never sell you a device that you do not need. If it won't improve your business and make your life richer, it doesn't go out the door. Period.

“The way it's always been” isn't the right way. We want to do better.

Always Built In Our FDA-Compliant Facility Right Here In Las Vegas, NV.

Medicreations devices are some of the only aesthetic care devices fully manufactured in the United States, with at least

61%

of all components sourced from U.S. suppliers.

Our FDA-compliant facility features a clean room and full-service center, staffed by our excellent team of professionals. Every device is meticulously built and subject to strenuous quality control checks before shipping out.

We film videos of our process and offer guided tours of our facility on request. We are proud of how we build our devices and what goes into them.

If you're ever down in Vegas, let us know and we'll show you around!

Upending The Field Of Aesthetic Treatment With Less Complication, Greater Effect.

Retinol. Vitamin cocktails. Acids. Antioxidants. CBD.

If you use any of those solutions with your patients, the MediClear's HydroSonic Infusion™ is a complete game changer when it comes to maximizing efficacy.

Operation couldn't be simpler.

Fill up the syringe.

**Set the pressure levels and
pulse timings via the device's
touchscreen interface.**

Go.

The main handpieces utilizes pressure to push solution up to 3 mm below the surface of the skin, where it is able to deliver its full potency.

Electronically-controlled operation means that every treatment goes exactly how you expect it to. True consistency. Unmatched precision.

Three pieces work to have it all come together.

The MediClear Platform Provides A Triple Medley Of Facial Renewal.

MediClear μ C:

A full-powered microcurrent roller with a detachable head, with two available sizes. Not only does the current that runs through the roller provide lift and plumpness to the skin—it widens pores to enhance the effectiveness of Sonic Injection. Note that the MediClear μ C does not penetrate the skin, and is not an invasive tool with a 5mm needle depth.

MediClear Inject:

True software-controlled sonic injection is available to estheticians for the first time through the MediClear Inject handpiece. Ultrasonic pressure is utilized to push vitamins, antioxidants, acids, and many other topical solutions deep into the skin, up to 3mm. The delivery utilizes the skin's natural pores, but the pressure also creates holes about 150 microns in diameter to aid in product absorption—a size smaller than a human hair.

MediClear Ice:

The attached cooling handpiece is ideal for shrinking pores after treatment, as well as reducing inflammation. The MediClear Ice can reach temperatures of -5°C , excellent for soothing skin or numbing a target area.

As Potent As You Want It —Or As Gentle.

Flexibility is one of the biggest advantages a software-controlled injector has over purely mechanical ones.

With the MediClear, you completely control the intensity of any treatment or session.

Set how deep every injection goes. How fast the injector shoots. How much solution is delivered.

You can adjust it all via the touchscreen interface for whatever solution you want to apply.

By customizing each session, you'll be able to deliver ideal treatment outcomes for your patients and get them feeling amazing both after treatment and during.

The MediClear's HydroSonic Infusion™ is the perfect technology to provide truly effective, non-invasive beautification.

Every Medicreations Device Is Backed By An Industry-Leading 2-Year “We’ll Fix It” Warranty.

In the rare event your devices malfunction or break due to a technical defect—we’ll **take care of it.**

The benefit of having our manufacturing facility in the U.S. is that we always have access to the very same engineers and technicians who designed and built your machine in the first place. We know exactly how to get your devices working perfectly again. And if we don’t? We’ll replace it at no charge. **Simple.**

We stand behind our products for a full two years—double that of the industry standard. Nor do we require you to pay tens of thousands of dollars for that warranty.

If you buy any Medicreations device, you just won’t have to worry about it for a full 730 days, with options past that.

The Whole Is Greater Than The Sum Of Its Parts, And **Definitely** One Part Alone.

To most med spa operators, a single device can seem like an incredible investment. Here's the calculus.

If a machine works out well, the buyer might earn a return in 2-3 years. At which point they might buy a different one. Rinse and repeat, and they could one day provide the full range of experiences their patients are looking for. Theoretically.

Let's skip that.

Medicreations offers a whole suite of products to deliver comprehensive aesthetic treatments for patients, all at the cost of a single device from other manufacturers. You can provide hair removal alongside skin tightening, body sculpting with muscle toning, or any other synergistic combination. No waiting for years—you could own them all tomorrow.

The difference between 1 device & several is incalculable.

It's a single instrument against an orchestra, a solo competing with a symphony. Only when all the pieces meld together will you find yourself producing that cohesive experience that is "just so."

We'll Teach You Everything About Your Device (And More Besides).

We *love* helping people learn the science and use behind our products. Seriously. So much so we actually built a little academy here in Vegas to do it better.

You'll receive a comprehensive onboarding process when you get any of our lineup at no additional cost. Everything you need to know about usage and care of your devices will be included. That's expected, a given. But we offer more.

Marketing Help

Whatever you want to learn, we'll provide.

See If A Medicreations Device Is Perfect For You

Lets talk. We'll make sure you understand the science behind the device you're interested in, who it's ideal for, and how to get the most from it. And if during the process, you find out you're not so sure it's for you?

That's OK.

We only want to sell devices that we sincerely believe will be a benefit to your practice, help you hit the goals you want to hit, and blow your ROI out of the water.

Something that checks every box for you in particular, with NO exceptions.

Maybe that something will be a Medicreations device.
