

MC MEDICREATIONS

The MediMuscle

60,000 Muscle Contractions In 30 Minutes.

Need Results? Choose Proven Medical-Grade Electrical Muscle Stimulation (EMS) Technology.

EMS technology has an iron-clad track record as an effective way to maintain muscle density in medical environments and physical therapy. In fact, EMS devices are one of the few methods proven in impartial clinical trials to help tone muscle and burn fat.

Our MediMuscle EMS device is the best of the breed.

Many devices in this space use electromagnetic stimulation, which work on the nerves rather than the muscle fibers. But nerves get tired. That means there is a hard ceiling to effectiveness for electromagnetic technology.

The MediMuscle, instead, sends carefully controlled electrical energy straight into muscle fibers to induce contractions. In a 30 minute period our device induces, on average, over 60,000 muscle contractions. Electromagnetic devices would do 20,000.

Uniquely, the EMS handpiece has quad-directional plates which essentially “pinball” the energy between themselves during treatments. This produces even coverage and greater comfort during sessions with less of that “peak and valley” feeling.

To combat the increased lactic acid buildup from this level of workout intensity, infrared diodes are fired simultaneously during treatment, increasing blood and lymph flow to shorten recovery times.

No branded consumables needed.

America's Leading Clinics Use Mediceation Devices.

The MediMuscle:

Power	300W
Energy	60/90/120/185 mj
EMS Energy	0-0.6 J/S
EMS Frequency	38Hz
IR Wavelength	320mn & 810nm
Shockwave Pulse Therapy	Up to 2Hz

Sick of the Status Quo? So Are We.

The Medicreations
team has nearly

50

years of combined experience immersed in some of
the world's leading aesthetic device brands.

We've learned how things are "supposed to go" from the giants of the industry. **It's terrible.**

Devices built around... Expensive, single-use consumables. Manipulative sales tactics. Absurd pricing structures designed to gouge every last cent from care providers.

So... We got together some pretty smart scientists, engineers, and business people to do things differently.

Our revolutionary idea:

Make a living *with* the people who use our devices, not *from* them.

Quality Devices + Transparent Process + Fair Pricing = Our Promise

Aesthetic care professionals should have access to reliable, high-performance devices at prices that actually make sense.

That's why we design our machines to utilize *as few consumables* as possible, even when competitors don't. Why we have a *industry-leading two-year guarantee* for all parts and damage. Why even though we'd put our devices against nearly any other brand's in terms of performance, *we don't charge a premium*.

As for our process, our representatives will never sell you a device that you do not need. If it won't improve your business and make your life richer, it doesn't go out the door. Period.

“The way it's always been” isn't the right way. We want to do better.

Always Built In Our FDA-Compliant Facility Right Here In Las Vegas, NV.

Medicreations devices are some of the only aesthetic care devices fully manufactured in the United States, with at least

61%

of all components sourced from U.S. suppliers.

Our FDA-compliant facility features a clean room and full-service center, staffed by our excellent team of professionals. Every device is meticulously built and subject to strenuous quality control checks before shipping out.

We film videos of our process and offer guided tours of our facility on request. We are proud of how we build our devices and what goes into them.

If you're ever down in Vegas, let us know and we'll show you around!

How The MediMuscle Can Give People The Most Intense Workout Of Their Lives:

1

Muscle at rest

2

Direct electric stimulation

3

Muscle contracting

Thoughtfully Designed For Treatment Providers And Patients.

The MediMuscle has been designed to fit into how estheticians actually work. The handpieces are effective on nearly all body types and contoured to perfectly fit the most common treatment areas.

Plus, the device is essentially "set-and-forget." Straps on the handpieces secure the EMS panels to the patient's body and, once active, the technology will work its magic without any further action needed from the care provider.

That means this is the perfect time to offer other treatments alongside a MediMuscle session. Many facials, for instance, can be performed without interfering with EMS treatment.

Note that we do not recommend practitioners leave patients without supervision during a session. However, in the event they step out, the patient has access to a "panic" button if they experience unexpected fluctuations in treatment.

And that's not all.

The Only High-Powered Facial EMS Attachment On The Market.

When it comes to facial contouring, tightening skin and removing fat are only two parts of the picture. Muscles can completely change the shape of a person's face and how people see it.

That's why many of your patients can benefit from a high-intensity facial workout through the MediMuscle's Facial EMS handpiece.

This is an excellent treatment option for both men and women looking for a stronger, sharper, more defined jawline. And it pairs excellently with other facial treatments.

A Radial Shockwave Massager Fights Cellulite And Tightens Skin For Comprehensive Body Treatment.

The included radial shockwave massager provides potent post-treatment care to complement and enhance results from EMS technology.

High energy shockwaves emitted from the handpiece resonate through the skin to squeeze tissue and break up cellulite, resulting in more even skin tone and feel. This also stimulates blood and lymph flow, aiding in muscle recovery times.

A treatment is not a replacement for actual exercise and proper eating habits. But it will prove an incredibly effective supplement to them.

Ultimately, the MediMuscle delivers “confidence in a bottle” in just a few 15-30 minute sessions.

Every Medicreations Device Is Backed By An Industry-Leading 2-Year “We’ll Fix It” Warranty.

In the rare event your devices malfunction or break due to a technical defect—we’ll **take care of it.**

The benefit of having our manufacturing facility in the U.S. is that we always have access to the very same engineers and technicians who designed and built your machine in the first place. We know exactly how to get your devices working perfectly again. And if we don’t? We’ll replace it at no charge. **Simple.**

We stand behind our products for a full two years—double that of the industry standard. Nor do we require you to pay tens of thousands of dollars for that warranty.

If you buy any Medicreations device, you just won’t have to worry about it for a full 730 days, with options past that.

The Whole Is Greater Than The Sum Of Its Parts, And **Definitely** One Part Alone.

To most med spa operators, a single device can seem like an incredible investment. Here's the calculus.

If a machine works out well, the buyer might earn a return in 2-3 years. At which point they might buy a different one. Rinse and repeat, and they could one day provide the full range of experiences their patients are looking for. Theoretically.

Let's skip that.

Medicreations offers a whole suite of products to deliver comprehensive aesthetic treatments for patients, all at the cost of a single device from other manufacturers. You can provide hair removal alongside skin tightening, body sculpting with muscle toning, or any other synergistic combination. No waiting for years—you could own them all tomorrow.

The difference between 1 device & several is incalculable.

It's a single instrument against an orchestra, a solo competing with a symphony. Only when all the pieces meld together will you find yourself producing that cohesive experience that is "just so."

We'll Teach You Everything About Your Device (And More Besides).

We *love* helping people learn the science and use behind our products. Seriously. So much so we actually built a little academy here in Vegas to do it better.

You'll receive a comprehensive onboarding process when you get any of our lineup at no additional cost. Everything you need to know about usage and care of your devices will be included. That's expected, a given. But we offer more.

Regular Webinars With Top Doctors On The Science

Marketing Help

Whatever you want to learn, we'll provide.

See If A Medicreations Device Is Perfect For You

Lets talk. We'll make sure you understand the science behind the device you're interested in, who it's ideal for, and how to get the most from it. And if during the process, you find out you're not so sure it's for you?

That's OK.

We only want to sell devices that we sincerely believe will be a benefit to your practice, help you hit the goals you want to hit, and blow your ROI out of the water.

Something that checks every box for you in particular, with NO exceptions.

Maybe that something will be a Medicreations device.
